Clyde River Water Quality Report

Climate Smart Pilots

March 9, 2023

www.farmdecisiontech.net.au

Foreword

Funding

This work has been produced by the NSW Primary Industries Climate Change Research Strategy funded by the NSW Climate Change Fund.

NSW Department of Primary Industries Disclaimer

This is a research trial and pilot project, and you should not rely solely on the information or advice provided in these reports.

Feedback and Questions

Please provide feedback and questions to Harvey Bates

Contents

List of Figures

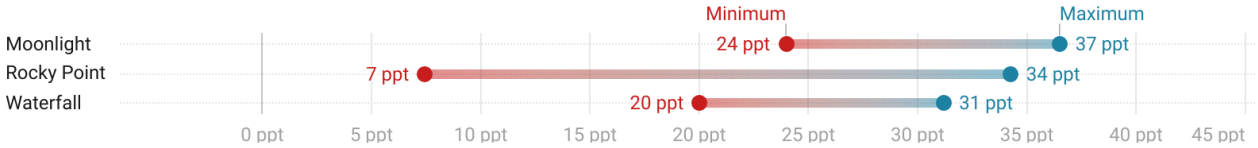
This data is released by NSW Department of Primary Industries for evaluation purposes only and should not be relied upon for business decisions, carrying out risk assessments or other uses.

1 Salinity

1.1 Weekly

Weekly Minimum and Maximum Salinity

These values represent the absolute minimum and maximum recorded values from Buoys within each harvest area.



Units represent parts per thousand (ppt). This is equivalent to both g/kg and g/L.

Source: FarmDecisionTECH • Created with Datawrapper

Figure 1: These values represent the highest and lowest salinity reading a buoy has recorded in each of the harvest areas in the past week.

7-Day Salinity Average Trend

Average daily salinity at each buoy throughout the Clyde River.

Waterfall Moonlight Rocky Point

Rocky Point

	Friday	Saturday	Sunday	Monday	Tuesday	Wednesday	Thursday
Waterfall Creek	27.7 ppt	28.5 ppt	28.7 ppt	29.2 ppt	29.9 ppt	30.9 ppt	31.5 ppt
Rocky Point	26.2 ppt	27.1 ppt	27.7 ppt	28.2 ppt	28.8 ppt	29.1 ppt	29.2 ppt
Chinamans Point	25.0 ppt	25.5 ppt	25.9 ppt	26.4 ppt	26.8 ppt	27.6 ppt	28.2 ppt
Angry Man Point	8.1 ppt	8.5 ppt	8.7 ppt	8.9 ppt	9.1 ppt	9.0 ppt	9.2 ppt

Waterfall

	Friday	Saturday	Sunday	Monday	Tuesday	Wednesday	Thursday
Buckenbowra Creek	25.4 ppt	25.5 ppt	25.9 ppt	26.3 ppt	26.8 ppt	27.8 ppt	28.4 ppt
Big Island West	22.5 ppt	23.8 ppt	24.1 ppt	24.3 ppt	24.9 ppt	25.3 ppt	26.0 ppt
Double Bay	21.7 ppt	23.2 ppt	24.1 ppt	23.9 ppt	24.2 ppt	24.7 ppt	24.9 ppt

Moonlight

	Friday	Saturday	Sunday	Monday	Tuesday	Wednesday	Thursday
Snapper Point	29.3 ppt	30.8 ppt	31.5 ppt	31.8 ppt	32.8 ppt	32.9 ppt	33.1 ppt
Wray Street	27.7 ppt	28.7 ppt	29.8 ppt	30.3 ppt	30.6 ppt	31.2 ppt	31.2 ppt
Moonlight	27.4 ppt	29.2 ppt	29.7 ppt	30.1 ppt	30.5 ppt	31.0 ppt	31.1 ppt
Budd Island North	26.1 ppt	26.6 ppt	27.2 ppt	28.0 ppt	28.3 ppt	29.0 ppt	29.5 ppt

Units represent parts per thousand (ppt). This is equivalent to both g/kg and g/L.

Figure 2: This figure represents the daily average salinity of each of the buoys contained within a harvest area. Its designed to reduce the impact of tides and provide the general trend of salinity over the past week for specific locations within harvest areas.

This data is released by NSW Department of Primary Industries for evaluation purposes only and should not be relied upon for business decisions, carrying out risk assessments or other uses.

1.2 Fortnightly

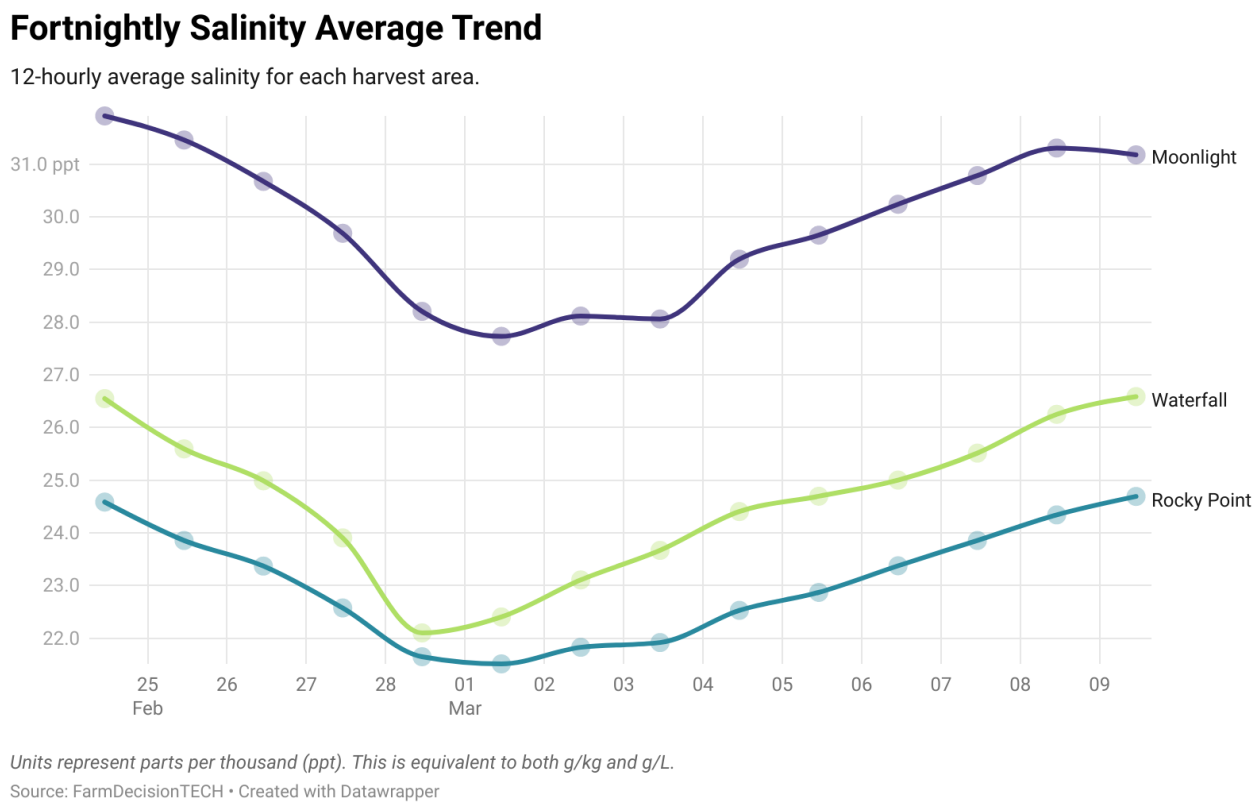

Figure 3: This figure represents the daily average salinity of all buoys contained within a harvest area. Its designed to reduce the impact of tides and provide the general trend of salinity over the past week.

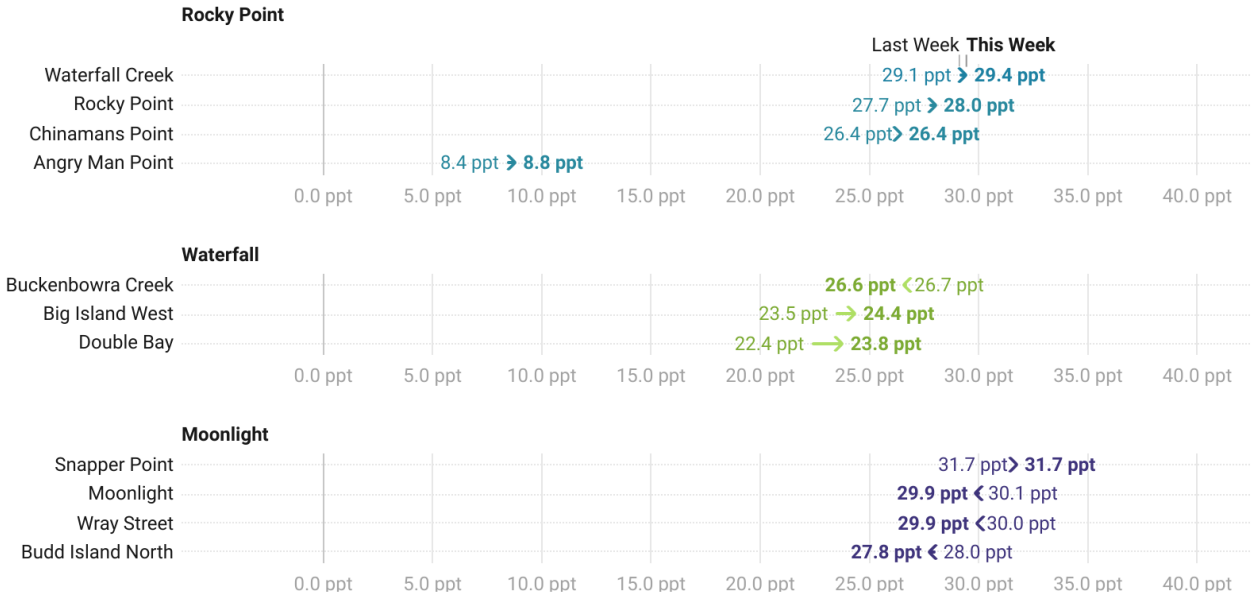
This data is released by NSW Department of Primary Industries for evaluation purposes only and should not be relied upon for business decisions, carrying out risk assessments or other uses.

Fortnightly Average Salinity Trend

Comparison between this weeks average salinity and the average salinity last week. Left pointing arrow means salinity is decreasing, right pointing means salinity is increasing.



Units represent parts per thousand (ppt). This is equivalent to both g/kg and g/L.

Source: FarmDecisionTECH • Created with Datawrapper

Figure 4: This figure demonstrates the average difference in salinity for this week compared with the prior week. It displays a longer term, general trend to see if salinity is increasing, stabilising or decreasing.

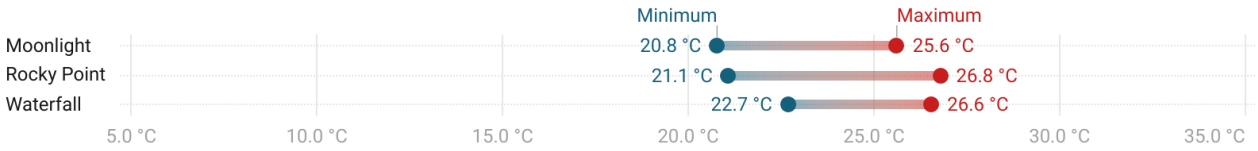
This data is released by NSW Department of Primary Industries for evaluation purposes only and should not be relied upon for business decisions, carrying out risk assessments or other uses.

2 Water Temperature

2.1 Weekly

Weekly Minimum and Maximum Water Temperature

These values represent the absolute minimum and maximum recorded values from Buoys within each harvest area.



Source: FarmDecisionTECH • Created with Datawrapper

Figure 5: These values represent the highest and lowest temperature reading a buoy has recorded in each of the harvest areas in the past week.

7-Day Temperature Average Trend

Average daily temperature at each buoy throughout the Clyde River.

Waterfall Moonlight Rocky Point

Rocky Point

	Friday	Saturday	Sunday	Monday	Tuesday	Wednesday	Thursday
Waterfall Creek	24.2 °C	24.0 °C	24.3 °C	25.0 °C	24.9 °C	24.0 °C	23.7 °C
Angry Man Point	24.1 °C	24.0 °C	24.2 °C	24.8 °C	24.7 °C	24.0 °C	23.5 °C
Chinamans Point	24.2 °C	24.0 °C	24.3 °C	24.8 °C	24.8 °C	23.9 °C	23.4 °C
Rocky Point	23.9 °C	23.7 °C	24.1 °C	24.5 °C	24.3 °C	23.2 °C	23.0 °C

Waterfall

	Friday	Saturday	Sunday	Monday	Tuesday	Wednesday	Thursday
Double Bay	24.4 °C	24.3 °C	24.7 °C	25.2 °C	25.3 °C	24.8 °C	24.6 °C
Buckenbowra Creek	24.2 °C	24.2 °C	24.5 °C	24.9 °C	25.0 °C	24.1 °C	23.7 °C
Big Island West	24.3 °C	24.3 °C	24.4 °C	24.8 °C	25.0 °C	24.4 °C	24.1 °C

Moonlight

	Friday	Saturday	Sunday	Monday	Tuesday	Wednesday	Thursday
Snapper Point	23.7 °C	23.6 °C	23.9 °C	24.4 °C	24.2 °C	23.1 °C	22.9 °C
Budd Island North	23.6 °C	23.5 °C	24.0 °C	24.4 °C	23.9 °C	22.9 °C	22.8 °C
Moonlight	23.4 °C	23.3 °C	23.8 °C	24.2 °C	23.7 °C	22.6 °C	22.5 °C
Wray Street	23.4 °C	23.3 °C	23.7 °C	24.0 °C	23.6 °C	22.3 °C	22.2 °C

Temperature is displayed in degrees Celsius (°C)

Source: FarmDecisionTECH • Created with Datawrapper

Figure 6: This figure represents the daily average temperature of each of the buoys contained within a harvest area. Its designed to reduce the impact of tides and provide the general trend of temperature over the past week for specific locations within harvest areas.

This data is released by NSW Department of Primary Industries for evaluation purposes only and should not be relied upon for business decisions, carrying out risk assessments or other uses.

2.2 Fortnightly

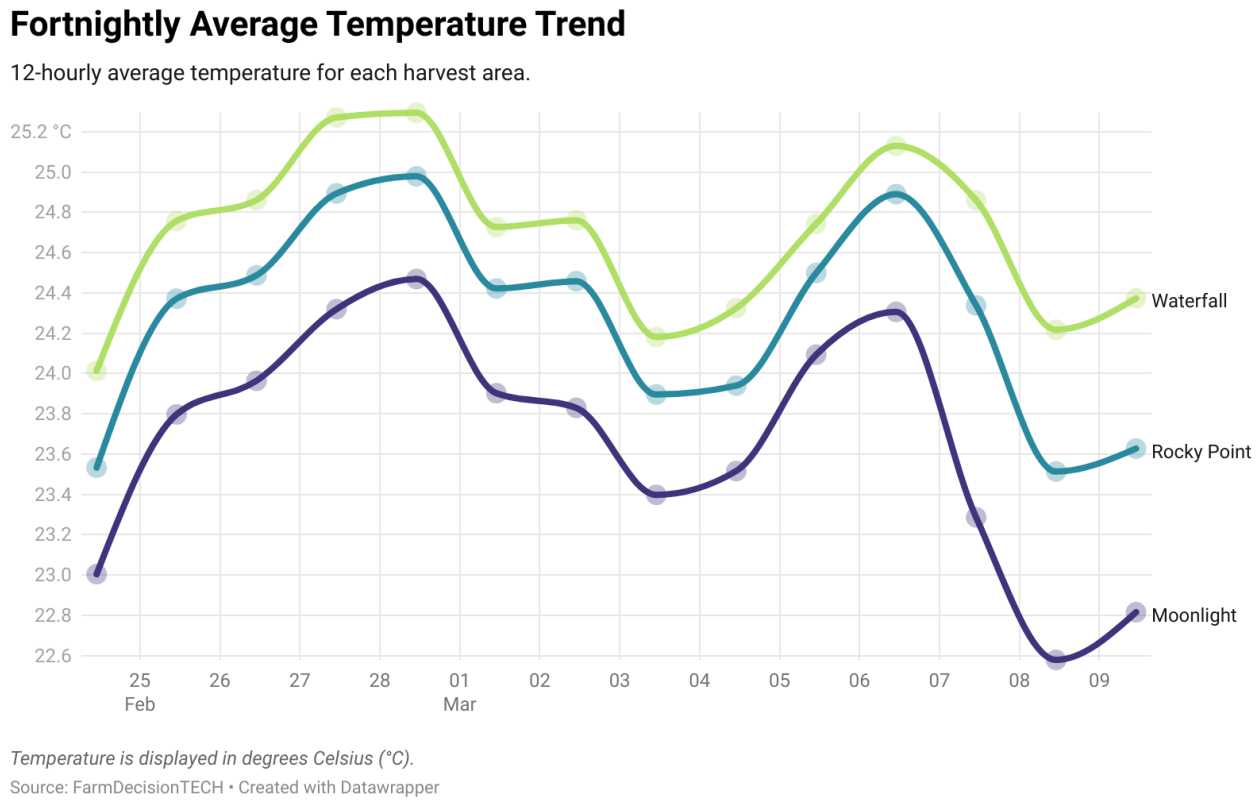


Figure 7: This figure represents the daily average temperature of all buoys contained within a harvest area. Its designed to reduce the impact of tides and provide the general trend of temperature over the past week.

This data is released by NSW Department of Primary Industries for evaluation purposes only and should not be relied upon for business decisions, carrying out risk assessments or other uses.

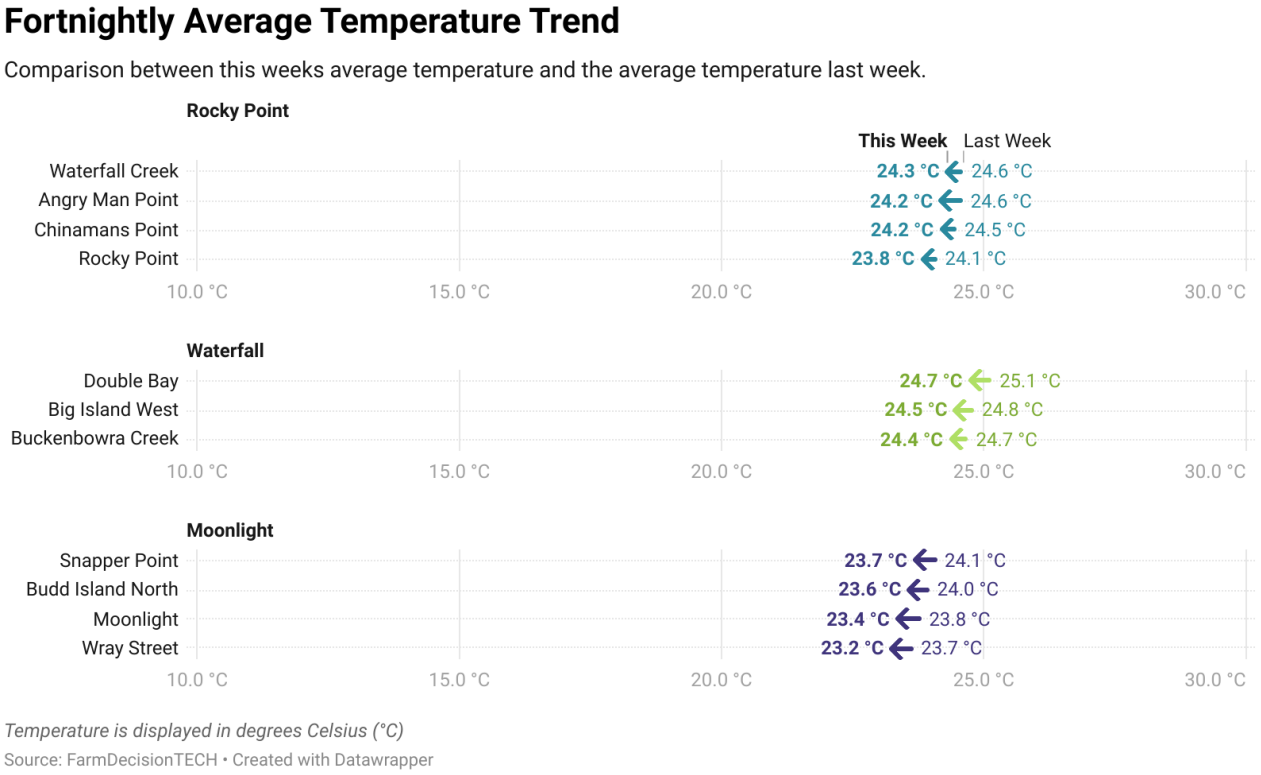

Figure 8: This figure demonstrates the average difference in temperature for this week compared with the prior week. It displays a longer term, general trend to see if temperature is increasing, stabilising or decreasing.

This data is released by NSW Department of Primary Industries for evaluation purposes only and should not be relied upon for business decisions, carrying out risk assessments or other uses.

2.3 Historical

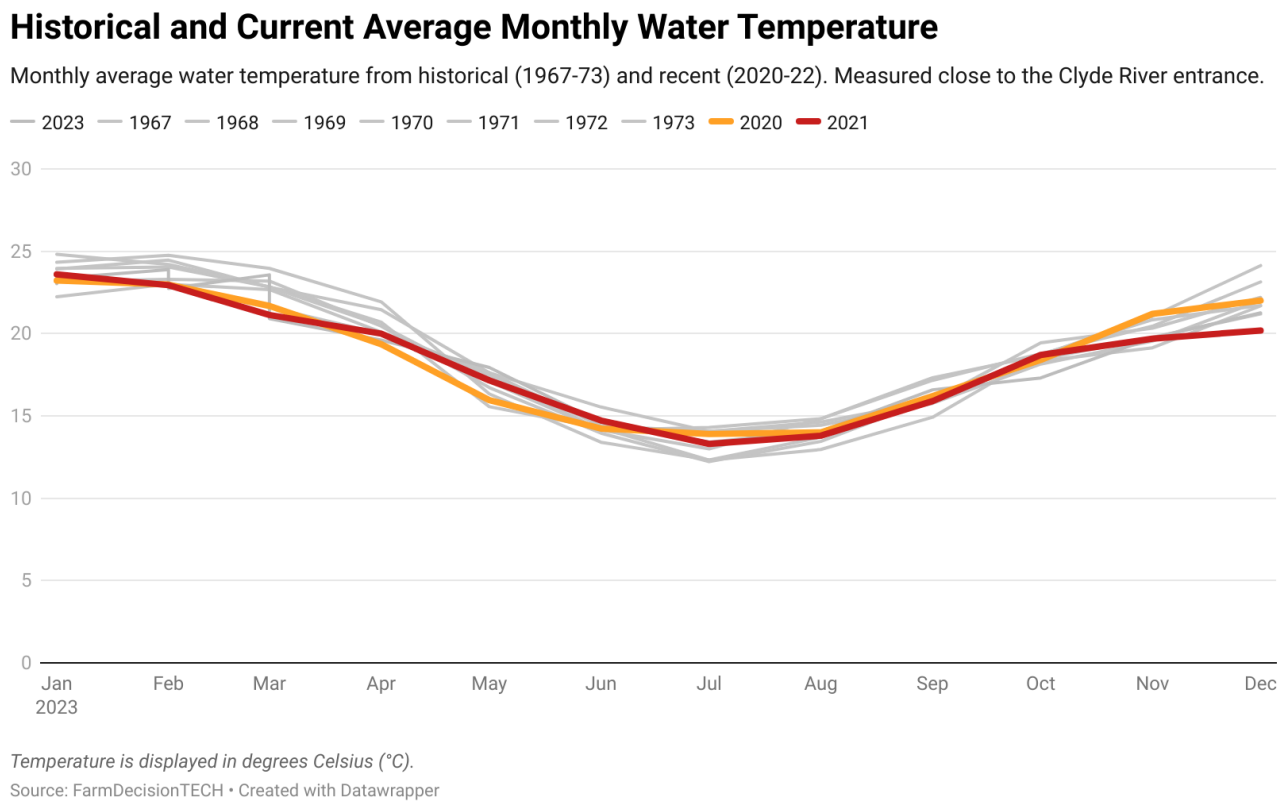

Figure 9: Monthly average water temperature from historical (1967-73) and recent (2020-22). Measured close to the Clyde River entrance.

This data is released by NSW Department of Primary Industries for evaluation purposes only and should not be relied upon for business decisions, carrying out risk assessments or other uses.

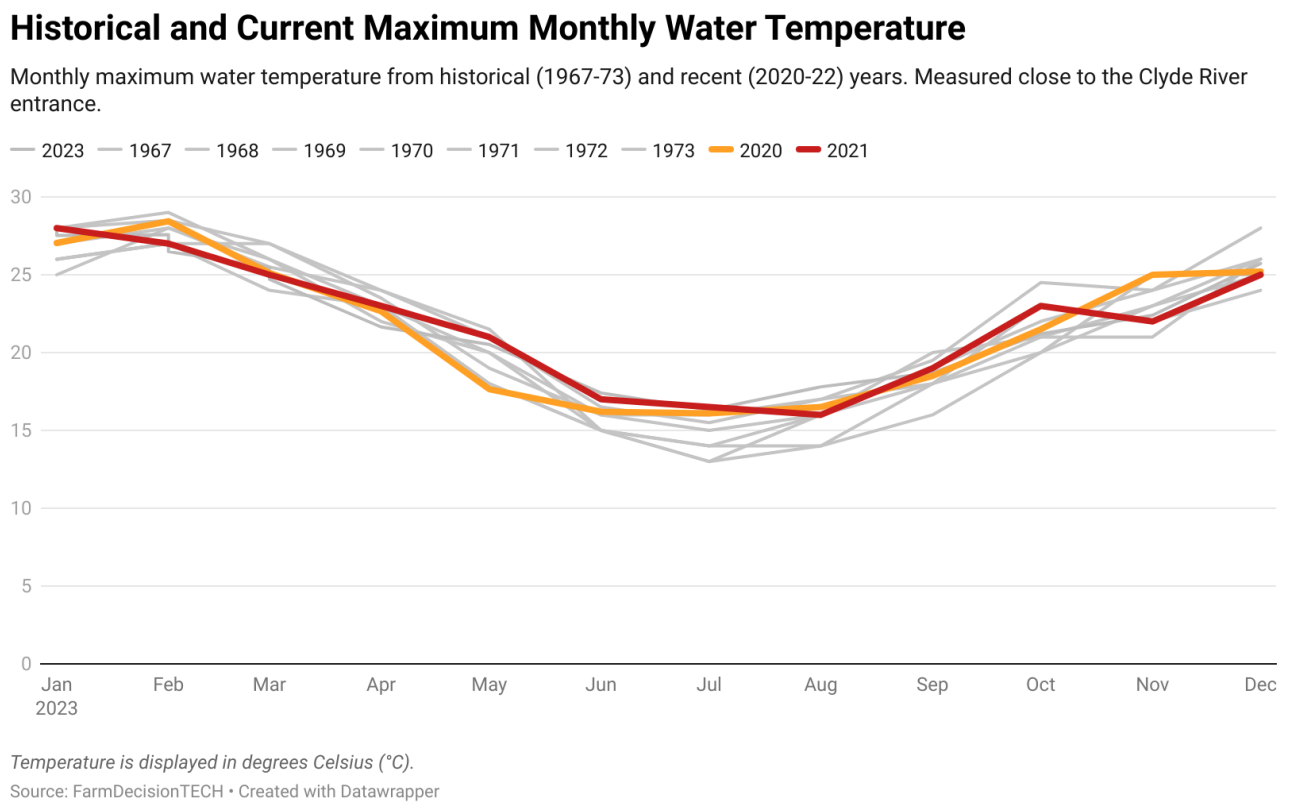

Figure 10: Monthly maximum water temperature from historical (1967-73) and recent (2020-22). Measured close to the Clyde River entrance.

This data is released by NSW Department of Primary Industries for evaluation purposes only and should not be relied upon for business decisions, carrying out risk assessments or other uses.

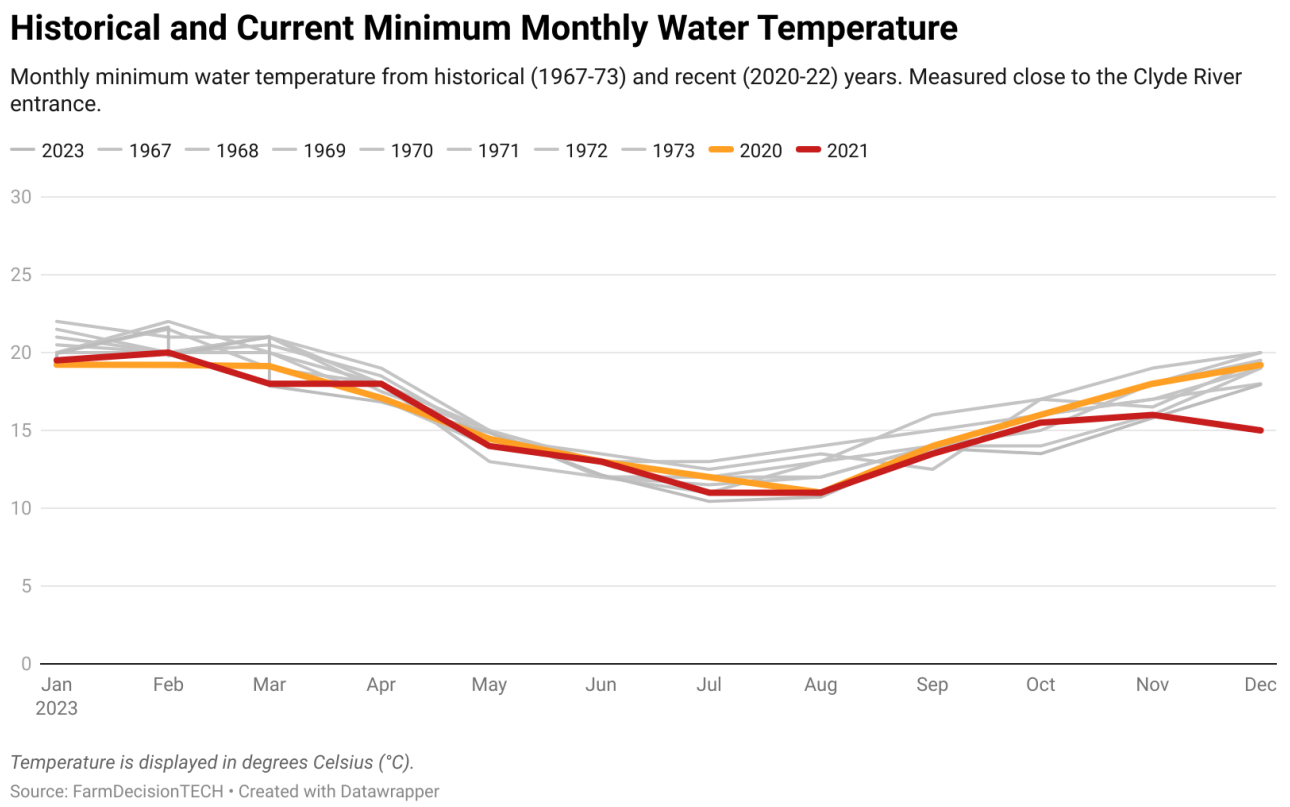

Figure 11: Monthly minimum water temperature from historical (1967-73) and recent (2020-22). Measured close to the Clyde River entrance.

This data is released by NSW Department of Primary Industries for evaluation purposes only and should not be relied upon for business decisions, carrying out risk assessments or other uses.

3 Precipitation

3.1 Weekly

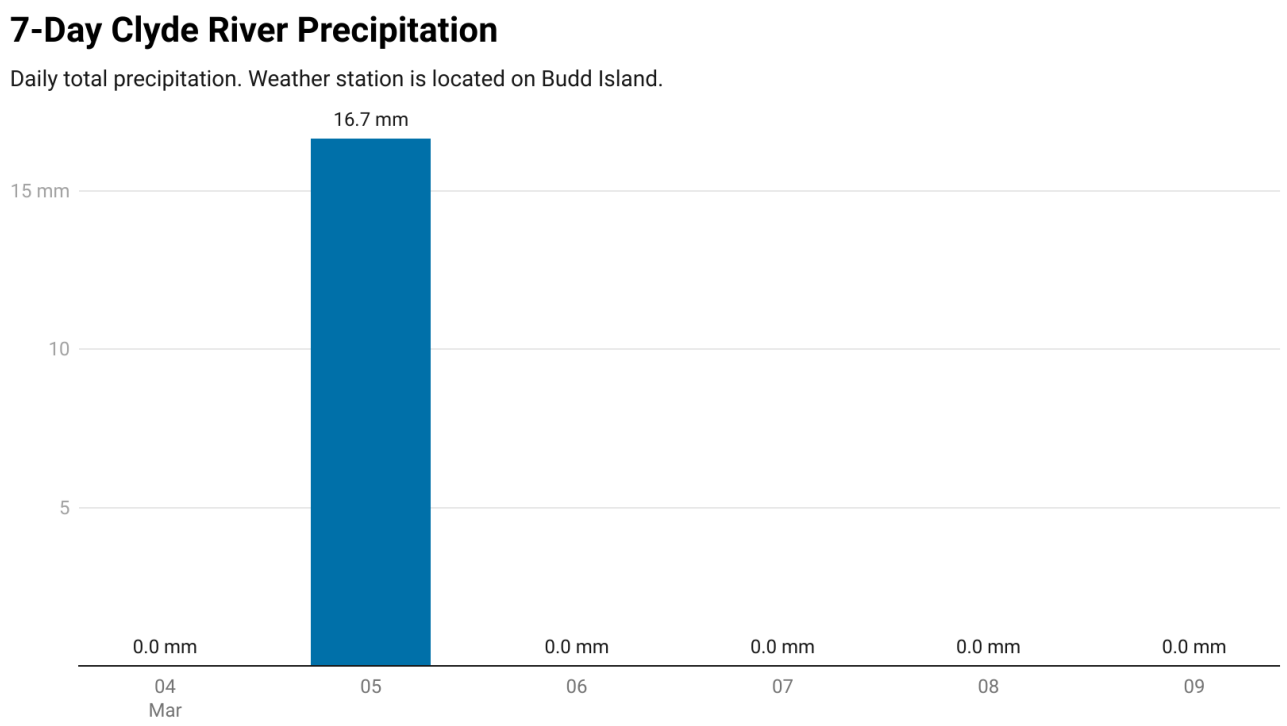

Figure 12: Daily total precipitation at Budd Island for the past week.

This data is released by NSW Department of Primary Industries for evaluation purposes only and should not be relied upon for business decisions, carrying out risk assessments or other uses.

3.2 Yearly

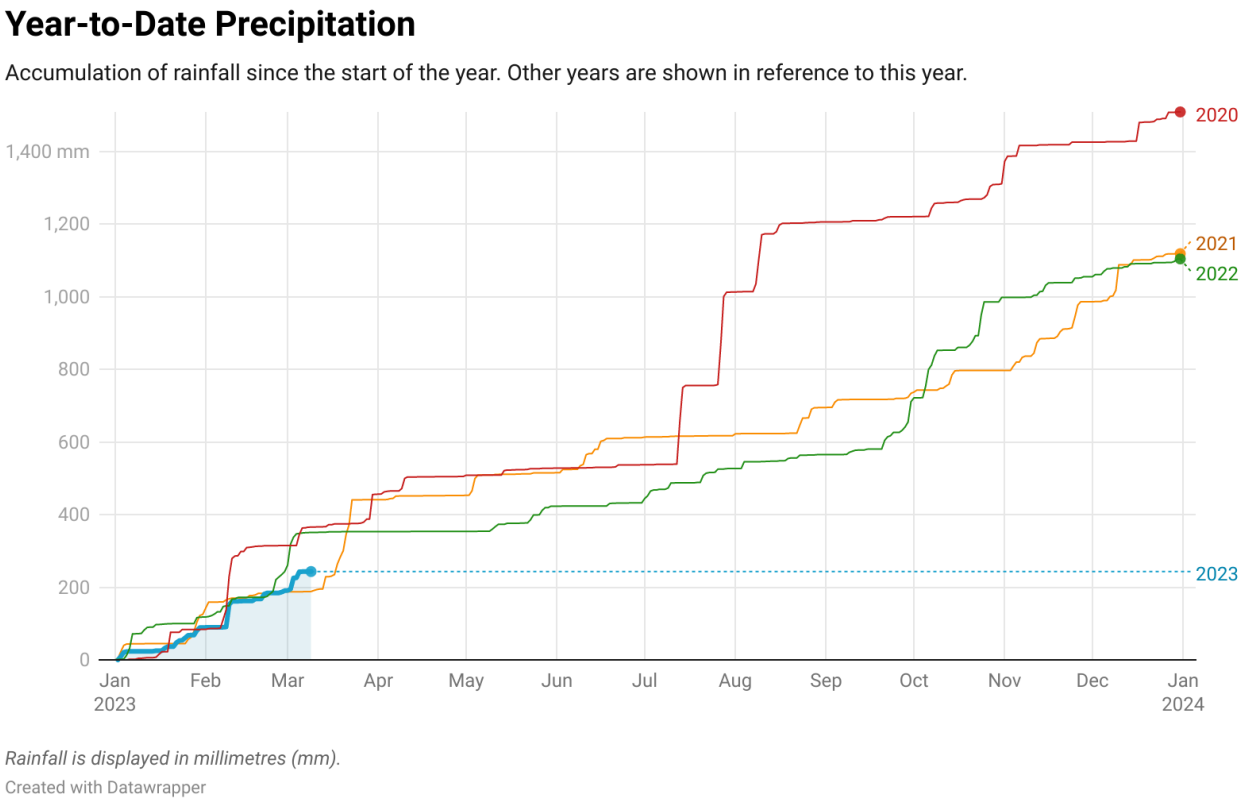

Figure 13: Compares this years total precipitation against previous years.

This data is released by NSW Department of Primary Industries for evaluation purposes only and should not be relied upon for business decisions, carrying out risk assessments or other uses.

4 Flow Rate from Tributaries

4.1 Fortnightly

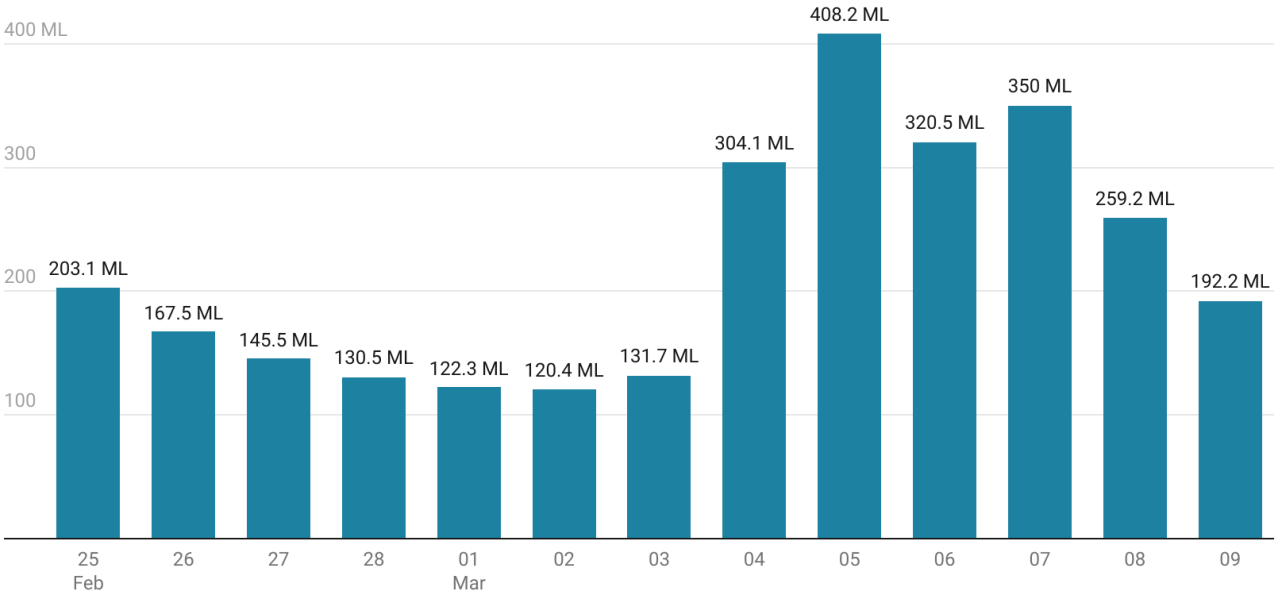

Figure 14: Fortnightly (daily total) water discharge from Brooman.

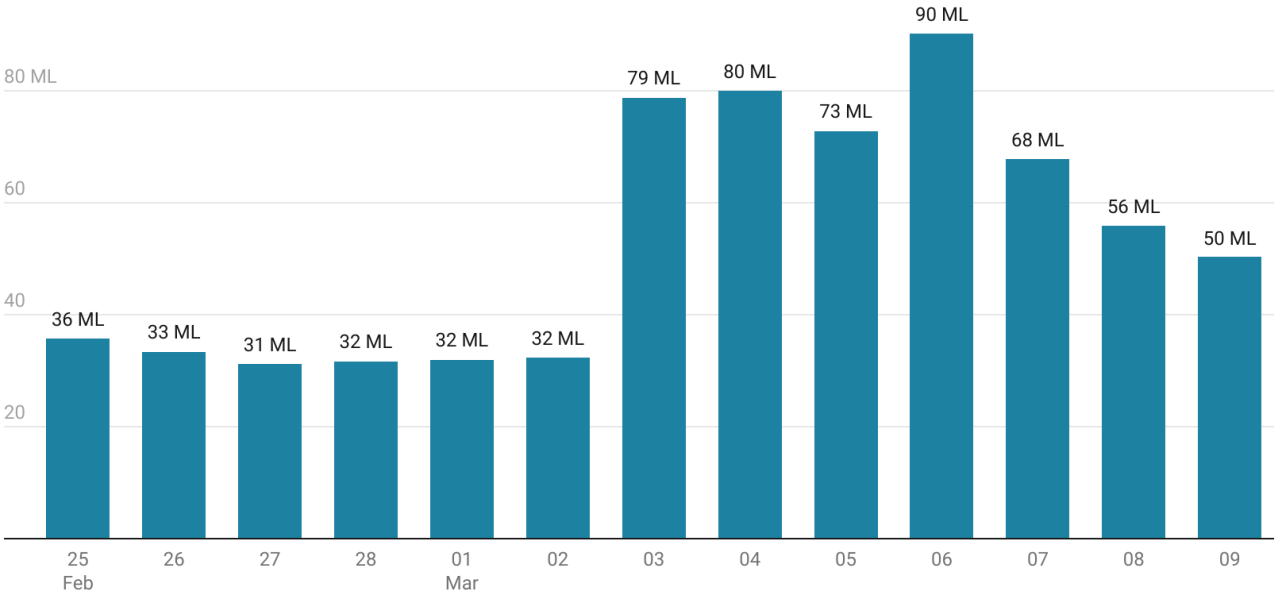
This data is released by NSW Department of Primary Industries for evaluation purposes only and should not be relied upon for business decisions, carrying out risk assessments or other uses.

Buckenbowra Tributary Fortnightly Discharge rate

Daily discharge rate totals for Buckenbowra Tributary. This station is roughly 8 km West of the Clyde River.



Values represent megalitres per day (ML/day). A mega litre is equal to 1 million litres. Quality Codes: 140 = Best available data, 145 = Data under review, 255 = Dataset not complete

Chart: © State of New South Wales through WaterNSW • Created with Datawrapper

Figure 15: Fortnightly (daily total) water discharge from Buckenbowra.

This data is released by NSW Department of Primary Industries for evaluation purposes only and should not be relied upon for business decisions, carrying out risk assessments or other uses.

4.2 Yearly

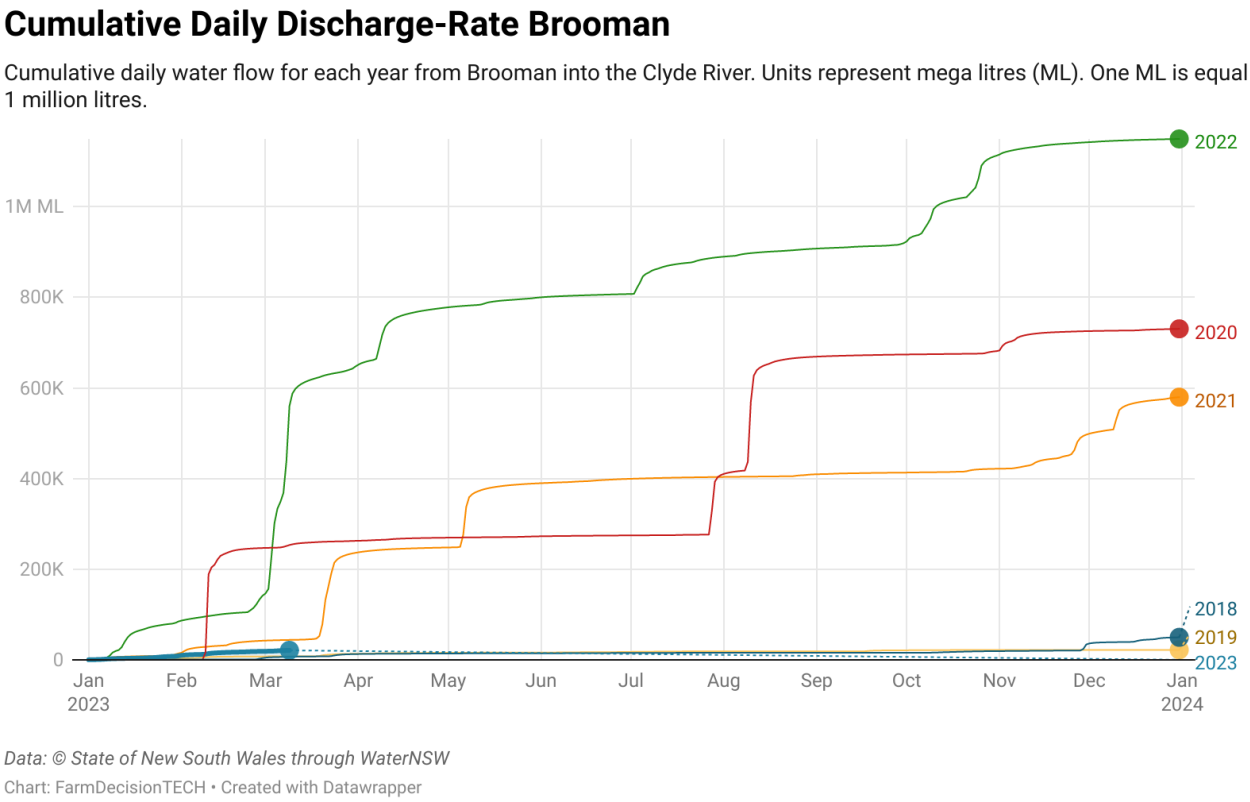


Figure 16: Compares this years total water discharge against previous years. Drought years (2018 and 2019) are shown for comparison.

This data is released by NSW Department of Primary Industries for evaluation purposes only and should not be relied upon for business decisions, carrying out risk assessments or other uses.
